H700

2 IN 1 Function Crawler Treadmill

1. H700 adopts high-end overall design combined with high-tech concept, which can make users experience in more aspects. Modes are divided into ① . Quick Start ② . Manual mode ③ . User mode ④ .P program (there are six P modes) ⑤ . Unpowered mode ⑥ . Resistance mode. Function Display: lap, slope, time, mode, pulse, calories, distance, speed. It provides a variety of choices for users with different needs.

2. H700 treadmill adopts crawler running belt, which is formed by advanced composite materials and incorporated into a soft shock pad to meet the requirements of high service life under strong load. Weight capacity high shock absorption, reducing resilience while absorbing the impact force of stepping, which can more effectively reduce the trigger pressure of the knee and protect the knee. At the same time, this running belt also has no requirements for training shoes, which can be barefoot and has a long service life.

3. The speed can be adjusted to 1 to 20 gears in normal mode, and the resistance value can be adjusted from 0 to 10 in resistance mode. Slope lifting support 0 ~ +15%; 1-20kmspeed adjustment, one of the keys of indoor running knee support lies in the angle of treadmill, most people running angle between 2-5 °. The slope of a higher angle is conducive to improving exercise efficiency and meeting various needs of customers.

4. Emergency brake switch is attached with safety latch and rope, which is more convenient to operate and use.

5. Its materials are solid, max load up to 200kg running without shaking, enjoying the feeling of smooth running.

6. Adopt vertical screen design to protect spine healthier. There are water bottle cage on the left and right sides of the screen respectively, which is convenient for users to replenish water and can also place other portable small objects. Wireless charging set is provided in the middle, eliminating users' worries about charging their mobile phones.

7. Equipped with heart rate grip, it can detect user heartbeat in real time.

8. The motor adopts the stable and continuous power output of 3HP high-power motor, which easily loads users of different weights.

9. Product Specification size: 2065*940*1720mm(length * width * height)

10. Net weight: 233KG

H710

Electric Treadmill

1. The H710 adopts a high-end overall design combined with high-tech concepts, which can provide users with a more diverse experience. The speed can be adjusted to 1–20 gears, and the slope can be raised or lowered by 0–15%; The key to adjusting the speed of 1–20 km/h for indoor running is the angle of the treadmill, which is between 2–5 ° for most people. A higher angle slope is beneficial for improving exercise efficiency and meeting various customer needs.

2. The emergency brake switch is equipped with a safety pin and rope, making it more convenient to operate and use.

3. Its materials are solid and can bear up to 200 KG without shaking during running, enjoying a smooth running experience.

4. Adopting a vertical screen design to protect the spine for better health. There are kettle racks on both sides of the screen, making it convenient for users to replenish water and place other small items with them. There is a wireless charging stand in the middle position, which eliminates the hassle of users charging their phones.

5. Equipped with a heart rate grip, it can detect the user's heart rate in real-time.

6. The motor adopts a 3HP high-power motor with stable and continuous power output, making it easy to load users of different weights.

7. Product dimensions: 1885 * 950 * 1705mm (length * width * height)

8. Net weight: 202kg

H600A/B

Commercial Treadmill

1. This product absorbs foreign high-end design inspiration, the overall shape is beautiful, subversive column design combined with the most popular creative elements, instantly highlights the treadmill's dignity and luxury.
2. The design of center console supported by ultra-wide aluminium alloy column provides a stable and reliable working platform for users.
3. The emergency brake switch is equipped with a safety clip and a tether, which is located in a prominent position below the front end of the armrest for easy use by the operator. It is safe and reliable to stop operation immediately when emergency power failure occurs. The heart rate monitoring device designed on the handle can detect the user's heart rate in real time and feedback the user's ideal heart rate state in time.
4. The design of the kettle rack on the left side of the central console is divided into two parts. It can not only place round kettles to facilitate users to replenish water in time, but also place keys, membership cards and other small items for easy access. The long storage tank designed in the middle position can hold mobile phones, tablets and other items, while doing sports while chasing dramas, sports and entertainment are both going on. On the right side of the slot, a wireless charging function is designed, which eliminates the user's charging worries. At the same time, the instrument table has designed a fast direct selection button, which facilitates users to choose slope and speed quickly, and brings users different experience.

5. Unique fan design under the display screen, using automobile -grade drum fan, large volume of wind, gentle wind, one-button switch, so that users can experience the pleasure of spring breeze while running.
6. The runway adopts a high elastic silica gel shock absorber system, a new design concept, with a widened runway structure, so that the athletes can reduce knee injury in the intense sports environment.
Running area: 1630x600 mm.
7. Innovative -3 degree gradient design brings a brand-new experience of gradient selection, users can choose more modes.
Running speed: 1-20 km/h.
8. The machine routinely sets nine automatic training modes and easy to operate, providing users with different requirements with a variety of choices.
9. The motor uses 3HP high-power motor, a real high-end commercial treadmill, easy to load users of different weights.
10. Product Dimensions: 2320*965*1695mm(LxWxH)
11. Net weight: 201 kg, gross weight: 223 kg
12. Maximum load: 200 kg

H500A/B

Commercial Treadmill

1. H500A/B adopts new design idea of North America, which makes H500A/B more succinct, massive and steady. The perfect combination of several advanced technology highlights noble and luxury. H500-A is a button version

2. The new frame design makes the center console extremely stable, providing a stable & reliable experience and quiet & comfortable use for exercise.

3. The emergency brake switch is equipped with a safety clip and a lanyard to stop the treadmill when the power is turned off. The lanyard and the safety clip can be attached to a protruding portion located at the lower portion of the front end of the armrest, which is very convenient for the exerciser to operate.

4. Two bottle cages will accommodate the exerciser's mobile phone in place and keep it in the center of the front, leaving enough room for keys, membership cards, etc.

5. The new and improved progressive damping system absorbs high impact motion and supports stable and controllable depressions.

6. Decline and Incline support -3% to +15%, capable of simulating various terrains; speed 1-20KM/h to meet various needs of customers.

7. Specialized 9 automatic training modes;

8. The motor uses continuous power 3HP high-power motors (220V, 60HZ, 9.8A) to easily drive a variety of different loads.

9. Running belt size 3325*558mm (effective use size 1420*558mm)

10. Product Dimensions: 2125*890*1730mm (length*width*height)

11. Net weight 158kg, gross weight 180kg

12. Maximum load: 200kg

H800

Surfing Machine

1. Improve body balance, coordination and exercise sensation; Improve core strength and stability; Effectively prevent injuries by improving muscle energy absorption capacity; Under the condition of maintaining body balance, the lower the center of gravity of improving physical fitness, coordination and core stability (more functional), the more energy the limbs absorb, the greater the training intensity; Provide users with shaping training, hip beauty, leg beauty; Increase the impact or stimulation of muscle tissue caused by gravity or speed.

2. Multi-function display dial, high-definition data display: Control your own sports data at any time, reasonably customize sports fitness plans, and make scientific fitness more dedicated.

Ideal handrail position: The ergonomic handle position and bending angle allow people of different bodies to hold it easily. During exercise, the hands and shoulders can extend forward moderately, making the movement more comfortable, and achieve the effect of hand movement

Adjustable base: Improve the balance, core strength and stability during physical exercise

3. Floor space: 2090*1135*1485mm

4. Net weight: 225.5KG

5. Function display: time、 speed、 fitness guide

6. Drive mode: motor drive

F20

2 IN 1 Function Rowing Machine

1.The rowing machine is a surface resistance, friendly to the heavy and injured, and can burn fat efficiently In the process of exercising,it will not cause damage to the body due to the influence of weight.The fat loss exercise is extremely high, and one action can mobilize more than 80% of the potential of the whole body

2. This rowing machine has the dual functions of wind resistance and magnetic resistance in one

·The wind resistance rowing function mainly depends on the combination of the blades and the tuyere. When the blades rotate, the air is squeezed to produce resistance. When the tuyere is small,the air inside cannot be discharged, and the resistance naturally increases.

·The magnetoresistive rowing function uses a magnetic field as a medium,and uses a metal flywheel and a magnet to generate resistance, which is more convenient to adjust the resistance.And because the magnetron does not generate friction, it is ultra-quiet.

Feel: more even and smooth resistance

Appearance: full of metallic

Storage: Relatively more space

Resistance size: multi-speed adjustable resistance

Maintenance: easy maintenance, anti-build

Size: 2405*625*1145mm

Wind resistance gear: 1-10gears

Magnetic resistance gear: 1-8 gear

Type: Detachable

Maximum load: 150kg

H510

Elliptical Machine

Adjustable natural gait slope
Adjustable slope 10°-35°
20 resistance levels
Weight: 154 kg

Power Supply: Self-generating
Heart rate monitoring: Yes
Size:(length * width * height):203 * 76 * 183 cm

Natural, low-impact stride exercise and proven reliability benefit you from every workout, while allowing you to enjoy consistent reliability and superior performance. The H510 elliptical training machine provides you with a cushioning exercise experience that matches the natural movements of the body and allows you to benefit more from your fitness.

The natural gait slope is adjustable, and the user can adjust the slope at a range of 10° – 35° , and conduct independent or crosstraining for specific muscle groups in the lower body to easily achieve the exercise goal.

The new adjustable gradient design of natural gait can better simulate the natural gait movement path during walking and running.

Easy to maintain, H510 is easy to clean and maintain, inheriting consistent reliability and thoughtful service.

In order to extend the service life of the active state indicator, the equipment is equipped with an external state indicator. With this indicator light, you and your staff can see clearly the operating status of the elliptical trainer and know when the equipment should be maintained.

Recumbent Bike

Product Dimensions: 1075*585*1370mm(length*width*height)

Driving Mode: Self-generating Motor

- Aerobic exercise, enjoy pure physical fitness, physical health and body shaping, easy exercise
- HD dashboard, adjustable and multifunctional, time, distance, calories, speed, Watt, heart rate

N.W:77kg

Heart rate monitoring: Yes

Maximum load: 150kg

Resistance Range: 0-20 (segment)

- Special low noise design to ensure a quiet environment
- Rotary pedal, non-slip and not easy to wear, enhanced fit

H530

Upright Bike

Product Dimensions: 1125*525*1565mm(length*width*height)

N.W:62.5kg

Maximum load: 150kg

Driving Mode: Self-generating Motor

Heart rate monitoring: Yes

Resistance Range: 0-20 (segment)

- Simple instrument design is clear and clear, making sports more clear
- Control exercise intensity reasonably according to the monitored heart rate to obtain effective exercise effect
- Carefully polished and adjusted to ensure smooth riding of high-speed sports, smooth and smooth
- The cushion can be adjusted back and forth to meet the sports needs of different heights and angles.

H300A

Arc Trainer

Product Size: (Long * Wide * High) 1765*970*1650mm

Product Name: H300A Arc Trainer(3 in 1 function)

Resistance Value: 900W 180rpm

Slope Section: 20

Step Length: 61cm

Maximum Loading Weight: 150KG

Power Supply: Self-generating

Program: Manual mode +Automatic mode

USB: Cell Phone Charging Function

Heart Rate: contact type.

Function: Elliptical, Skiing, Climbing

Whether it is beginners or sports enthusiasts, our highend H300A arc step trainer uses a spontaneous reluctance motor, and the size of the step can be adjusted to make the movement faster, safer, and more effective. According to foreign authoritative fitness institutions, it burns up to 16 % more calories than competitors such as elliptical machines or crosstraining machines. The knee pressure decreased by 83 %. Muscle endurance increased by 38 %. In addition, it can also significantly enhance strength training, cardiovascular health improvement This device is designed for lower extremities, upper extremities training and fullbody climbing exercise.

The display program setting provides the user with a convenient control center that can set up an exercise plan. An independent control center, free to choose the exercise program. Members can easily set up exercise programs to charge the iPad or iPhone.

Our highend arc training equipment is solid and reliable, with low maintenance costs. After testing and verification of the three in one machinery, to practical and simple design, showing our high quality sports structure performance and health advantages. This highend arc training device is designed specifically for users and environments that value health over vanity. Our device offers complete options for weight loss, strength, and caloric exercise. Therefore, with a machine can meet the different needs of beginners and advanced athletes, so that you can easily enjoy health.

Our equipment is perfect for these exercise areas such as hotels, corporate fitness centers and families. The device offers a wider range of slopes and resistance, and it is no exaggeration to say that it has the function of having three devices in one device. Taxing like crosscountry skiing at low slope levels; A stepwise movement like an ellipsoidal machine at a medium slope level; At a high slope level, crawling like a stair. At any level of slope, the same traditional calorie consumption and safety are transmitted.

HFS Series

Vertical Climber

HFS 100

Manual Vertical Climbing Machine

- 1.**Model:** Warrior100
- 2.**Name:** Climber
- 3.**Product weight:** 45.5kgs
- 4.**Length/width/Height:** 1095*1050*2420mm
- 5.**Steel tube size:** Square tube 50* 1000* 2.5mm
- 6.**Climbing angles:** 70°
- 7.**Feet climbing height:** 540mm
- 8.**Safe Max load:** 120kg

9.Character:

Climber workout saves you valuable time while delivering the most effective fat and calorie burning workout available. Studies have proven a Climber workout burns more fat and calories in 15 min than Treadmills, Ellipticals, Steppers, and Bikes. When it comes to getting in shape, dropping unwanted pounds and building a stronger healthier heart, Climber offers the most effective, complete, total body work out available of any cardio equipment.

Exercise Bike

G12 Exercise Bike

The bicycle let the exerciser's whole body fully participate in sports and gains a truly dynamic and adjustable exercise experience. At the same time, it improved physical fit, fitness experience and service life, allowing exercise people to enjoy the dreamed riding experience.

G13 Commercial Air Bike

The bike has flexible personalization, allowing the trainer to maintain the target heart rate in low-intensity projects and also can switch quickly to the challenging high intensity intermittent training.

G14 Exercise Bike

The product adopts strong and durable design and is equipped with a certified chain driven system and high strength crankshaft, can provide excellent strength and durability, to meet the needs of all exercisers.

G15 Magnetic Exercise Bike

The zero contact gear and poleless magnetic drag of the bicycle is free of extreme magnetic resistance and it can adjust the resistance at will. It brings you unprece dented riding feelings, and its poleless resistance device can freely adjust, by which can bring you suitable resistance level.

G12

Exercise Bike

- ① The pedal installation adopts Mohs taper, which is more closely coordinated and not easily damaged;
- ② Drive multiwedge belt scheme;
- ③ All use 19.5 kilograms (43 pounds) of peripheral plus heavy flywheels. Add flywheel the weight of theperiphery can increase the inertia and help the bicycle to achieve smooth and smooth exercise ,offering outdoorrides closer to any other fitness car experience;
- ④ Aerodynamics and circular design, conducive to perspiration, and easy to clear cleansing and maintenance.All aluminum adjustable extenders and stamped post stabilizers the parts that need most rust protection will not rust;
- ⑤ Oversized steel frame, better overall corrosion resistance, appearance and stiffness obtained promotion;Equipped with front and rear handle adjustment and stronger anticorrosion aluminum stabilizer.
- ⑥ Device size and weight:
Length +width +height: 1330*525*1220mm
Weight: 63 KG

G13

Commercial Air Bike

Model: D13

Brand: MND Fitness

Name: Commercial Air Bike

Product weight: 59kgs

Length h/width/Height: 1365*610*1440mm

Steel tube size: Flat Oval tube 97*40*2.5mm

Character: The great thing about the Airbike is that it can work for a beginner, a rehabbing athlete, or a seasoned pro training at the highest levels of competition.

- ① **Digital Display:** Calories-Heart Rate(Blue tooth with heart rate Monitor)- Distance - Time - Odometer interval Training.
- ② Heavy Duty Steel Frame eliminates side-to-side movement.
- ③ 25" diameter Steel Fan.
- ④ Hybrid seat with multi-adjustment options.
- ⑤ Industrial powder coating for durability.
- ⑥ Reinforced pedals and crank
- ⑦ 10 sealed cartridge bearings, utilized in every pivot.

G14

Exercise Bike

- ① Pedal installation using.Msing Mohs taper,with more closely,not easy to be damaged;
- ② Drive Mode Multiwedge Belt Scheme;
- ③ All use 19.5kg(43lb)external heavier flywheel; Increasing the weight of the flywheel outer ring increases the inertia, helps the bicycle to achieve a smooth movement,providing an experience that is closer to outdoor cycling than any other exercise biker;
- ④ Aerodynamics and round design is conducive to perspiration,and easy to clean and maintain. All the aluminum a djustable parts and the post-stabilizer can ensure rust-proof parts;
- ⑤ Large size steel frame is better to make sure the overall corrosion resistance ,appearance and stiffness can be improved;it with front,rear handle adjustment and corrosion resistance of the aluminum stabilizer.
- ⑥ Device size and weight:
Long +width +height: 1310*535*1275mm
Weight: 61 KG

G15

Magnetic Resistance Exercise Bike

Character:

1. Magnetic resistance adjustment dynamic bicycle, belt antiskid technology, Pidaichuandong supersilent, belt loose need not be removed Loading can be adjusted;
2. Brake pads do not contact the flywheel, arbitrary adjustment of resistance, smooth silky, infinite strength, to bring you unprecedented riding experience.
3. Free adjustment without limit resistance, always find the right resistance point for you.

Other Character:

- ① Lifetime Maintenance-free, no need to replace the brake pads.
- ② Handles and cushions can be adjusted back and forth, up and down, to meet users of different heights and different riding modes. The adjustment of each part is equipped with calibration tips.
- ③ The handle and adjustment parts of cushion are made of aluminum alloy material to prevent rust.
- ④ Leather cushions use high elasticity, high density foam, wear resistance, soft texture, reduce the pain caused by long-term sitting.
- ⑤ N.W: 61.5KG, Overall more solid, safer.
- ⑥ Product Size: L*W*H: 1310*535*1275mm

G16

Magnetic Resistance Exercise Bike

- 1.The pedal is installed with Morse taper, which is more closely matched and not easy to be damaged
- 2.Commercial grade pure aluminum rear flywheel, high-speed operation without drifting
- 3.Oversized steel frame, with better overall corrosion resistance
- 4.Aerodynamics and circular design
- 5.Stepless magnetic control regulation

V Series

Instruction

Clear and concise muscle target makes it easier for trainers to know and learn.

Updated Weight Stack

The weight can be increased or decreased according to trainer's own situation, and the magnetic pull pin has good safety protection effect.

Adjuster

Humanization Design Adjustment. Trainers can adjust the position according to personal body condition

6mm Thick Steel Cable

Fitness equipment uses 6mm thick steel cable, which is more durable and safer.

X Series

Steel Pipe

Stable, durable and not easy to rust

Handlebar

The handlebar the non-slip handle make it easy for the exerciser to adjust to the proper posture ,which makes the referral training more suitable.

Hydraulic Cylinder

Six different gears provide different resistance to the trainer, allowing different trainers to find the right way to exercise.

Seat

Designed according to ergonomics, high quality PU leather. The seat can be adjusted in multiple steps,so that different body types of athletes can find a suitable posture for themselves.

H series commercial hydraulic cylinder cycle trainer is a series of strength training equipment developed by Minolta Fitness Equipment Co., Ltd. The H-series is ideal for fitness, slimming and improving health, and offers fitness enthusiasts a different fitness style than traditional gym training. The H cycle training equipment converts the fluid energy of the hydraulic cylinder into a linear motion of reciprocating push or pull in the cylinder, and the movement is smoother and simpler. Each model exercises a training session and a series is a professional fitness mode. Safe to use, less to sports injuries, create a harmonious training atmosphere for trainers, especially for middle-aged and older trainers. The hydraulic cylinder can adjust different resistances, and the trainer sets the appropriate gear position. This series uses high-grade aluminum alloy hydraulic cylinders. The installation design of hydraulic cylinders is safe and reliable, and the sport mode conforms to the human body simulation exercise track. Easy to move to suit the needs of the site, aluminum joints are used for each joint, and cushions and cushions use environmentally friendly materials.
