MaxPro

General features for all Racing lanes

The disc consists of wings at different angles, and slots that are orientated to kill the wave more quickly and effectively compared to the other products on the market.

The disc is made in PP with antioxidant and anti-UVA treatment. The pigments, that are used in the colourations for discs and floats, have 8 of colour fastness. 8 is the maximum of Blue Wool Scale – (ISO 105-B01-1988), daylight resistance.

Available colours: green, red, royal blue, yellow and white

Stainless steel cable AISI316 4mm complying to standards EN 12385 4

Waterfly racing lanes are made according to **FINA FR 2.1.7** rules
