CFS Italia products are made in compliance with ISO regulations and undergo thorough tests to ensure safe use in hospital environments.

Our furniture complies with multiple standards and regulatory requirements, such as: CE marking, CATAS certification, and ISO certification.

Certificates

Company

CFS Italia designs and manufactures healthcare equipment and furniture with a design that combines functionality, comfort, and aesthetics.

With over 25 years of experience, we work with public and private facilities, nursing homes, hospitals, and rehab facilities to create welcoming and practical environments, where the well-being of guests and patients comes first.

Design

Each project by CFS Italia starts with a careful evaluation of the needs of the facility.
We plan on-site visits to analyze the spaces in detail and listen to the needs of the medical & nursing staff and their patients, offering tailor-made solutions.

We customize every aspect, from colors to fabrics, to help internal management and create a welcoming atmosphere that is pleasing for patients, visitors, and staff.

Production

Control of the production process, selection of materials, attention to detail, customization, and listening: these are the pillars of our company's philosophy.

These principles guide the creation of tailor-made hospital furniture and equipment to fully meet each client's specific requirements. CFS Italia takes care of every detail of the project: from design phase to after-sales assistance.

"The difference between something good and something great is attention to detail."

Charles R. Swindoll

Pre-configured trolleys

The choice is easy with our ready-made solutions

Our pre-configured trolleys are designed with the end user in mind. Suitable for everyday use in hospitals, nursing homes, clinics and healthcare facilities.

Made with highly resistent materials and easy to clean & disinfect, our trolleys are functional tools in everyday activities and in emergency situations.

Our design combines functionality and aesthetics, our goal is to support health-care personnel with easy to use products and to improve the well-being of the patient.

Emergency

Trolleys suitable for storing all necessary tools and consumables for life-saving assistance.

From page 74

Medication

Trolleys suitable for unit-dose therapy, with dedicated medication bins for each patient.

From page 84

Treatment and Procedure

Trolleys suitable for everyday use, keep all medical equipment at your fingertips.

From page 94

Anesthesia

Trolleys suitable for safe storage of essential anesthesia equipment and medications.

From page 112

Collection and Storage

Trolleys suitable for all hospital wards, where you can store any kind of medical equipment or other materials.

Pre-configured trolleys

Emergency

Efficient management of critical events

In the most sensitive situations, emergency carts assume a key role in the safety and effectiveness of interventions. Quick and safe access to life-saving drugs and tools can determine the outcome of a critical event.

All of our crash carts are created to:

- act promptly and effectively in emergency situations;
- reduce response time and optimize rescue procedures;
- improve coordination and communication among healthcare personnel;
- increase the level of safety for patients and staff.

These trolleys are designed for resuscitation wards, emergency departments, emergency response corners, hospital wards, nursing homes and field hospitals.

With a carefully thought-out design, our emergency trolleys facilitate all emergency department operations. Thanks to the study of actual use cases of medical personnel, their structure is well organized and efficient in emergency situations.

Pre-configured trolleys

Medication

Optimize the workflow for drug treatment

Unit-dose therapy trolleys, or medication trolleys, are designed for storage, transport and delivery of medications, with dedicated compartments for each dose or type of medication. They help the nursing staff administer each patient's medication according to the doctor's prescription. All medications from different patients are safely divided.

The most common features of medication carts are:

- compartments and drawers;
- large or small unit-dose bins with dividers;
- labels with bar code and patient name.

This type of trolley may contain dangerous drugs that require a high level of control. CFS Italia has the answer: we design drawers with special locks, so that safety is guaranteed even when the cart is unattended.

These trolleys feature a design that facilitates transportation directly to the patient's bedside, a great advantage for improving treatment management.

PRE-CONFIGURED TROLLEYS

Treatment and Procedure

A mobile station for patient treatment

Procedure carts are equipped with all you need for patient treatment. They provide quick access to useful tools for treating a wound in the post-operative course, such as bandages, gauze, scissors, bottles, plasters, disinfectants, and syringes.

The main functions of a treatment trolley are:

- ease the transition from storage or medicine cabinets;
- reduce travel time;
- have everything at your fingertips in one mobile station;
- improve the experience of both operator and patient.

Usually, these trolleys have special shelves, compartments or drawers to prevent the risk of contamination and ensure high standards of hygiene. They are used in different facilities such as hospitals, nursing homes or small clinics, and allow all healthcare personnel to optimize their workflow.

PRE-CONFIGURED TROLLEYS

Anesthesia

Keep equipment and medications organized

Anesthesia trolleys are a must-have tool in the operating room. It helps anesthesiologists keep everything they need at hand and well organized.

Anesthesia carts by CFS Italia offer:

- clear organization with drawers and compartments of different sizes, so you always know where medications and tools are located;
- a secure locking system that gives only authorized personnel access to dangerous medications;
- useful accessories such as IV pole, upstand with tilt bins, catheter holder and side storage compartments.

Made of durable materials that are easy to clean, our anesthesia trolleys are designed to be practical and safe during every procedure.

PRE-CONFIGURED TROLLEYS

Collection and Storage

Efficient storage and transport of medical equipments and other materials

Storage trolleys are designed to handle large quantities of medical supplies in a safe and convenient manner. Ideal for ensuring efficiency in daily operations, these carts feature baskets and drawers of different sizes for all your needs.

Our storage carts offer:

- easy access and transport thanks to a very practical design and the choice of lightweight but sturdy materials;
- the possibility of standardization in all departments and wards thanks to ISO-compatible baskets and drawers.

Collection and storage trolleys by CFS Italia are designed to fit multiple hospital environments. They are an effective solution to optimize supply management, as well as to maintain an organized and functional work environment.

PRE-CONFIGURED TROLLEYS

Medical Records

Easy access to clinical data

Patient chart or medical records trolleys are designed to transport and store patients' clinical data. They are a key tool for keeping all information well organized and easily accessible during ward rounds.

Our patient chart trolleys offer:

- efficient organization with spacious drawers for storing medical records and multiple compartments with dividers for documents of different sizes;
- easy manouverability and access to clinical documents.

Medical records trolleys by CFS Italia are made to simplify medical examination management with practical solutions that will support healthcare staff in daily operations. With a versatile design and customizable accessories, these carts facilitate quick access to the information needed for timely care.

PRE-CONFIGURED TROLLEYS

Isolation

The safest choice for critical environments

Isolation trolleys are designed to maintain a safe and sterile hospital environment during infectious disease care. These carts are placed outside patient rooms and can be easily recognized by their distinctive yellow color.

With these carts, all materials used, such as gloves, gowns, visors, and shoe covers, remain isolated to prevent the spread of germs. It is essential that these carts are well organized to minimize the risk of contagion.

Our isolation trolleys offer:

- visibility and recognizability, for easy identification of contents and use;
- convenient and quick access to needed materials;
- useful accessories such as a sterilization tray, special waste holder and gloves holder.

Isolation trolleys by CFS Italia are designed to facilitate the work of healthcare personnel and manage infections effectively and safely.

PRE-CONFIGURED TROLLEYS

Pediatric

Safe management of critical events

Pediatric trolleys are specialized trolleys equipped with 8 or 9 drawers of various colors according to the Broselow tape, a color-coded system known worldwide. Each drawer contains the most common accessories needed during resuscitation procedures.

Broselow tape measures the child's height and identifies a specific weight range, defined by a specific color. With the help of this tool health-care personnel is able to provide the most appropriate treatment for each child.

With pediatric emergency trolleys by CFS Italia and color-coded drawers, healthcare staff can:

- easily identify emergency supplies in a timely manner;
- find the appropriate material for a specific weight range;
- simplify emergency procedures;
- organize materials for advanced pediatric support.

Pediatrics trolleys allow emergency professionals quick access to a patient's resuscitation kit or materials. This system increases the chances of saving a child's life, especially in critical, high-stress situations.

PRE-CONFIGURED TROLLEYS

Phlebotomy

The ideal solution for blood collection

Phlebotomy carts are essential to ensure that the blood sampling process is carried out quickly and safely. Designed to keep all necessary tools handy, these carts make phlebotomists' work easier and more effective.

Our phlebotomy trolleys offer:

- easy transport and maneuverability thanks to the lightweight and durable frame;
- optimal storage of vials, syringes and medical equipment, with well-distributed drawers and containers;
- enhanced safety and hygiene with specific holders for gloves, waste and needle containers;
- operational efficiency with side compartments for documents.

Designed for the daily needs of phlebotomists,our trolleys feature numerous drawers and compartments for clear and quick organization. Accessories such as a glove holder, waste bin, and holder for sharps containers ensure that every instrument is easily accessible and ready for use.

Materials have been carefully chosen to have a lightweight and durable frame, ideal for easy and safe transportation between rooms.

Furniture

We manufacture our products starting with a careful study of the materials, then we design them according to the daily needs of patients and healthcare personnel, and the environment in which they operate. With great attention to detail, quality, and design, we transform hospital spaces into welcoming and familiar places tailored to fit your requirements.

Service

Stainless steel trolleys with multiple configurations: drawers are made of technopolymer or stainless steel, shelves can be fixed or removable.
