Surgical Gown

We are EXPERTS in surgical gowns and isolation gowns manufacturing. After years of testing and innovation at our own lab, we are proud to present a spectrum of our gowns that passed all levels of American and European standards for surgical gowns and isolation gowns.

ANSI/AAMI PB70: 2012

Liquid barrier performance and classification of protective apparel and drapes intended for use in health care facilities.

Level	Test	Requirement	Anticipated Risk of Exposure to Body Fluid
1	Water resistance: Impact penetration test AATCC 42	≤ 4.5g	Minimal Level
2	Water resistance: Impact penetration test AATCC 42Water resistance: Hydrostatic pressure test AATCC 127	≤ 1.0g ≥ 20cm	Low Level
3	Water resistance: Impact penetration test AATCC 42Water resistance: Hydrostatic pressure test AATCC 127	≤ 1.0g ≥ 50cm	Moderate Level
4	Standard test method for resistance of materials used in protective clothing to penetration by blood-borne pathogens using PhiX174bacteriophage penetration as a test system ASTM F1671	Pass	High Level

EN 13795

Surgical gowns are standard equipment in hospitals. The introduction of the EN 13795 standard applies common quality standards to surgical gowns and clean-air clothing used as medical devices. The main purpose of this standard is the prevention of cross infection between patients and hospital staff during invasive surgery.

The standard EN 13795 defines two categories: high performance and standard performance equipment. Corresponding to the intensity and duration of the surgery, different performance requirements are necessary.

Characteristic	Test Method	Unit	Requirement			
			Standard Performance		High Performance	
			Critical Product Area	Less Critical Product Area	Critical Product Area	Less Critical Product Area
Microbial Penetraton -Dry	EN ISO 22612	CFU	Not Required	≤ 300	Not Required	≤ 300
Microbial Penetraton - Wet	EN ISO 22610	/B	≥ 2.8	Not Required	6.0	Not Required
Cleanliness MicrobialBioburden	EN ISO 11737-1	CFU/100 cm²	≤ 300	≤ 300	≤ 300	≤ 300
Particile Release	EN ISO 9073-10	log1o(lint count)	≤ 4.0	≤ 4.0	≤ 4.0	≤ 4.0
Liquid Penetration	EN ISO 811	cm H_20	≥ 20	≥ 10	≥ 100	≤ 10
Bursting Strength-Dty	EN ISO 13938-1	kPa	≥ 40	≥ 40	≥ 40	≥ 40
Bursting Strength-Wet	EN ISO 13938-1	kPa	≥ 40	Not Required	≥ 40	Not Required

Anticipated Risk of Exposure to Body Fluid				Low Level	High Level	

【Level 4 Procedure Gown】

WLG1000

AAMI Level 4 surgical gowns are intended to be used in procedures with a high risk of exposure.

Main Features:

Breathable Composite Fabric
Four Waistbands for Better Fit
Knitted Cuffs for Comfort

Performance:

Fluid Repellent
Against Blood-born Infectious Agent
Excellent Tensile Strength
Low-linting
Latex Free
Sterile or Non-sterile

Standard:

AAMI Level 4 Surgical Gown
EN 13795 High Performance

AAMI standards require a surgical gown to pass ASTM International F1671 in the critical zones in order to be labeled an AAMI level 4 surgical gown.

There are typically four different areas that must pass within the critical zones, including two in the front chest and two on the sleeves. If a product passes ASTM International F1671 in all applicable areas, then it qualifes as an AAMI level 4 surgical gown.

【Chemotherapy Gown】

WLG1005-L3

Full Coverage Chemotherapy Gowns provide comparable fluid protection to an AAMI Level 3 gown while also providing a barrier against hazardous chemotherapy drugs.

Poly-coated material
Full back style gowns that close and tie in the back
Taped seams provide added fluid protection
Knitted cuffs
Color:

REF	Style	Color	Size
WLG1005-L3KCB	Knitted Cuff	Blue	S-3XL

Standard:

AAMI Level 3 Isolation gown
ASTM F739-12

【Level 3 Reinforced Surgical Gown】

WLG1001-Hi

AAMI Level 3 surgical gowns are intended to be used in procedures with a moderate risk of exposure.

Main Features:

Soft Non Woven Fabric
Reinforcement on the Chest and Sleeves
Four Waistbands for Better Fit
Knitted Cuffs for Comfort

Performance:

Fluid Repellent
Against Blood-born Infectious Agent
Excellent Tensile Strength
Low-linting
Latex Free
Sterile or Non-sterile

Standard:

AAMI Level 3 Surgical Gown
EN 13795 High Performance

AAMI standards call for a surgical gown to meet the requirements mentioned above for AATCC 42 and AATCC 127 in the critical zones in order to be labeled an AAMI Level 3 surgical gown.

There are typically four different areas that must pass within the critical zones, including two in the front chest and two on the sleeves. If a product passes AATCC 42 and AATCC 127 in all applicable areas, then it qualifies as an AAMI Level 3 surgical gown.

【Standard Surgical Gown】

WLG1002-L2 / WLG1002-St

Features:

Light Breathable Fabric
High Tensile Strength
High Hydrostatic Pressure
Low-linting
Seams: Ultrasonic welding
Knitted Cuffs
Non-sterile

【Type PB-4B Chemical Isolation Gown】

WLG3001

Ideal for handling cytostatics and various laboratory activities. An effective barrier against many low-concentration, water-based inorganic chemicals (even under pressure), small-sized hazardous particles as well as oil repellent.

Knitted cuff for better comfort. Openness in the back closure for increased ergonomics of the wearer - the hazard and uncomfortable feeling of slipping is avoided while sitting in front of the bench.

Fabric: Microporous film laminate
Seam Type: Stitched & taped seams
Style: One piece opening at back, ties at waist and back neck, knitted cuffs

Standard:

EN 14605:2005+A1:2009 Type PB 4B
Protective performance against spray and infective agents

EN 14126:2003+AC:2004
Performance requirements and tests methods for protective clothing against infective agents

【Type PB-6B Chemical Isolation Gown】

WLG6B

The Type 6B PPE isolation gown is a protective garment designed to offer healthcare workers protection against liquid checmial,light spray and infective agents.

This gown is made of a lightweight fabric that is waterproof and resists penetration from harmful substances. It offers full frontal protection from the neck down to the knees, and the elastic wrist cuffs provide a secure fit that prevents any exposure.

Fabric: PP with PE coating
Seam Type: Stitched
Style: One piece openning at the back, ties at waist and back neck,elastic or knitted cuff.

Standard:

EN 13034:2005+A1:2009
Protective clothing against liquid chemicals - Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals

EN 14126:2003+AC:2004
Performance requirements and tests methods for protective clothing against infective agents

【Medical Face Shield】

WLEFSM

Perfect for high density situations, including if you work in events or hospitality, or if you travel by public transportation. The Medical Face Shield creates a barrier between you and other people with a plastic visor fitted to a comfortable foam head-band.

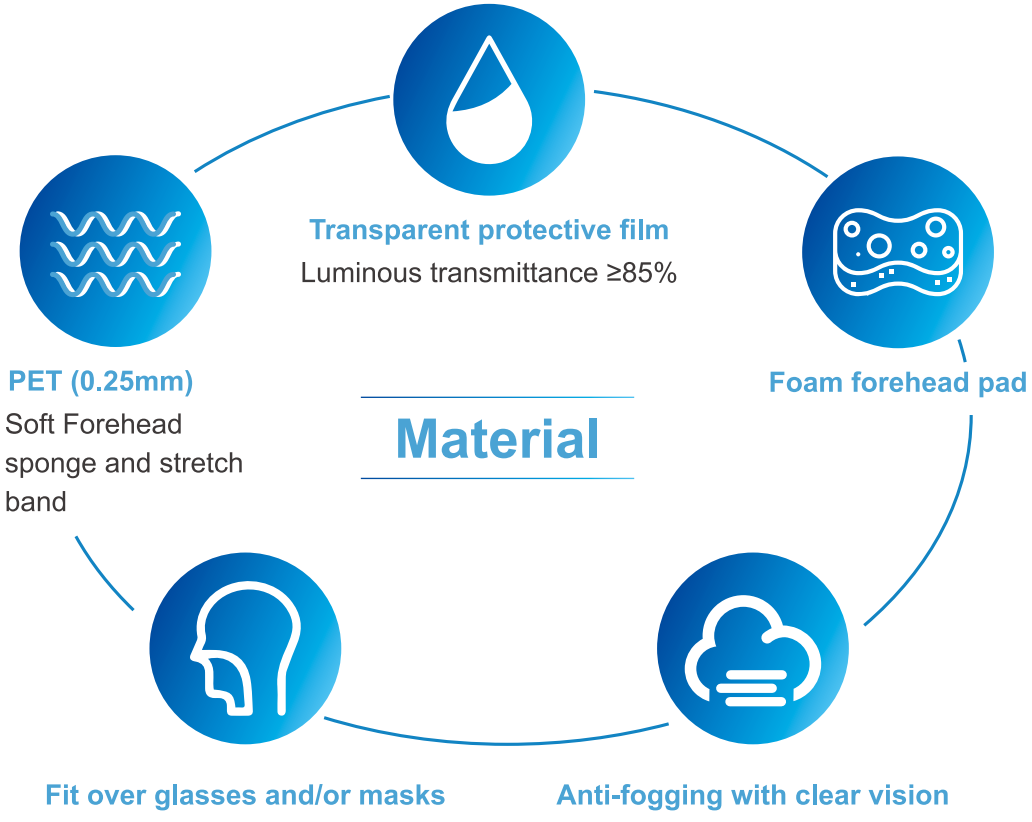

Feature:

Durable and long lasting visor made from fully transparent, lightweight plastic
Comfortable and easy-to-wear for an extended period of time
Reusable, recyclable

Standard:

CE MDR Regulation Mark
UKCA
ISO 16321-1:2022
